ODP 81-1098  
20 August 1981

MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson  
Director of Data Processing

SUBJECT: ODP Report for Week Ending 19 August 1981

\* Support to PTO

CAMS (COMIREX Automated Management System). A demonstration of the CAMSTACK color graphics software, developed under a CIA contract for CAMS, was presented to Admiral Poindexter, Chief of Staff to the National Security Advisor. The demonstration was well received. [redacted]

Printer Software Available for Testing

Software has been developed to support the Design 100 hard copy terminal as a local printer, and testing is now being done in Systems Programming Division, ODP. The software permits a 1200 baud line speed and uses forward/ reverse printing to increase the effective speed. The software is available for use by interested offices on a test basis. Demonstrations have been scheduled for two NFAC offices. [redacted]

Community Tour of Ruffing Center

A tour of the Ruffing Center was given to 20 Intelligence Community personnel on 13 August. The tour was in response to a request made by [redacted] the Information Science Center of OTE. [redacted]

Data Base Security Software Operational

ACF2, a software security package to control access to user-specified data bases, was implemented on the Tape Management System (TMS) in the Ruffing Center on 12 August. A minimal amount of user and procedural problems have been encountered. It is expected these problems will decrease as user and operator familiarization grows with this system. [redacted]

Administrative - Internal Use Only

External Procurement

ODP concurred in an external procurement request from OER/NFAC for timesharing services and the development of a nine country international source trade data base. The cost of the data base development will be \$240K, and the GSA Timesharing Services Program (TSP) contract will be used as the source of prices for the timesharing services required to access and manipulate the data. [REDACTED]

STAT

SAFE

On 18 August, representatives of the CSPO witnessed a demonstration of a programmable variable storage device for cryptographic keys used with various COMSEC devices. SAFE cryptographic development discussions were held after the demonstration, which took place at NSA. [REDACTED]
